

TMI Educator & Student Application

Product Description & Navigation Guide – Part 1

Overview

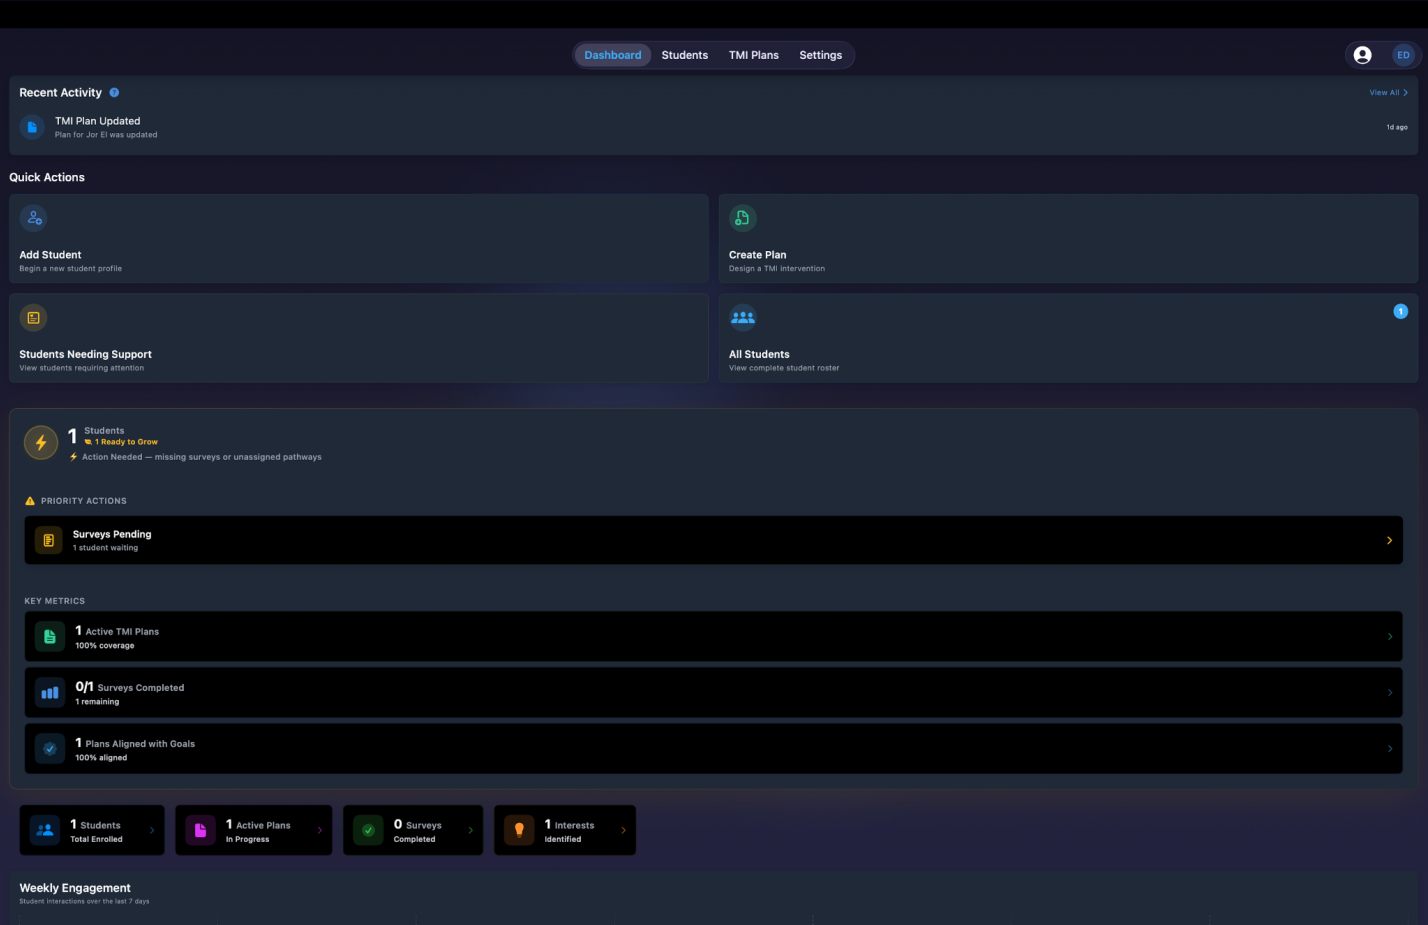

TMI (Tangible Modification Intervention) is a web application that helps educators and students work together on interest-driven intervention plans.

Part 1 of this guide walks through the main educator views (Dashboard, Students, TMI Plans, Settings) and the Student Mode experience used to collect interests and explore careers.

Dashboard

Educator Home and Key Metrics

The Dashboard gives educators a high-level snapshot of their roster. Recent Activity highlights updates to TMI plans, while Quick Actions provide shortcuts to Add Student, Create Plan, view Students Needing Support, and open All Students. Priority Actions and Key Metrics summarize surveys, active plans, and interest coverage across the system.

Student Profile

Individual Learner Overview

From the Students tab, educators can open a full profile for each learner. The profile shows age, grade, overall engagement, and the number of interests identified. Quick actions at the top make it easy to enter Student Mode, create a new plan, view existing plans, or review progress for that student.

The screenshot displays a mobile application interface for a student profile. At the top, a navigation bar includes a back arrow, tabs for 'Dashboard', 'Students' (selected), 'TMI Plans', and 'Settings', and a profile icon. Below the navigation bar, the student's name 'Jor El' is shown. A circular profile picture with the initials 'JE' is displayed, followed by the name 'Jor El' and 'Grade 9'. Below this, four action buttons are visible: 'Student Mode', 'Create Plan', 'View Plans', and 'Progress'. A summary section contains three cards: '12 Years Old', '50% Engagement', and '1 Interests'. Below the summary, the 'Interests' section shows a single interest, 'Basketball', with an 'Add' button. The 'TMI Plans' section, titled 'Active intervention plans for this student', shows a plan titled 'Acknowledge Your Interests and Hobbies - Jor El' with a red heart icon and a 'View' button.

Student Progress

Monitoring Outcomes for a Single Student

The Progress modal summarizes key metrics such as Engagement %, Active Plans, and Interests count for the selected student. A TMI Plan Progress list shows each plan and its completion percentage so staff can see which interventions are moving forward and which may be stalled.

TMI Plan Detail

Interests, Resources, and Next Actions

Opening a specific TMI plan reveals the full intervention structure. The header explains the model being used and surfaces the Next Action banner (for example, scheduling a check-in). Below that, the page highlights what the student cares about and lists personalized resources grouped by interest.

TMI Plan Detail (Strategies & Goals)

Turning Insight into Action

Further down the plan, educators see Intervention Strategies, Goals & Milestones, Scheduled Meetings, and Team Collaboration notes. These sections translate the student’s interests into concrete classroom practices and trackable goals that multiple adults can collaborate on.

All TMI Plans

Managing Active and Completed Plans

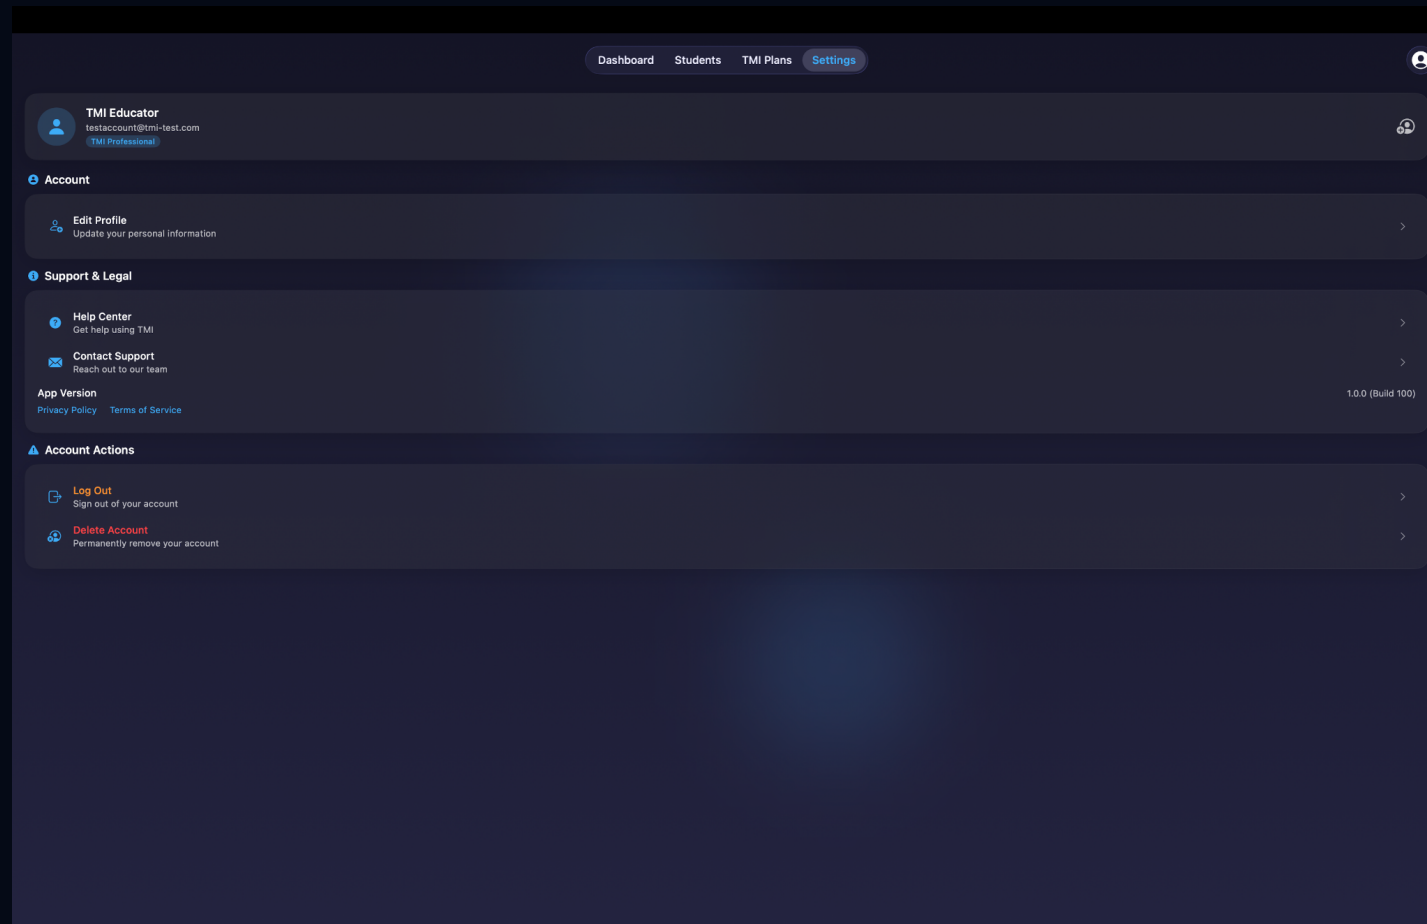

The TMI Plans tab centralizes all interventions across the school. A status bar toggles between Active and Completed plans, while search helps staff quickly locate a specific student or plan. Each card displays the plan name, model, student, and completion percentage.

Settings

Account, Support, and Legal

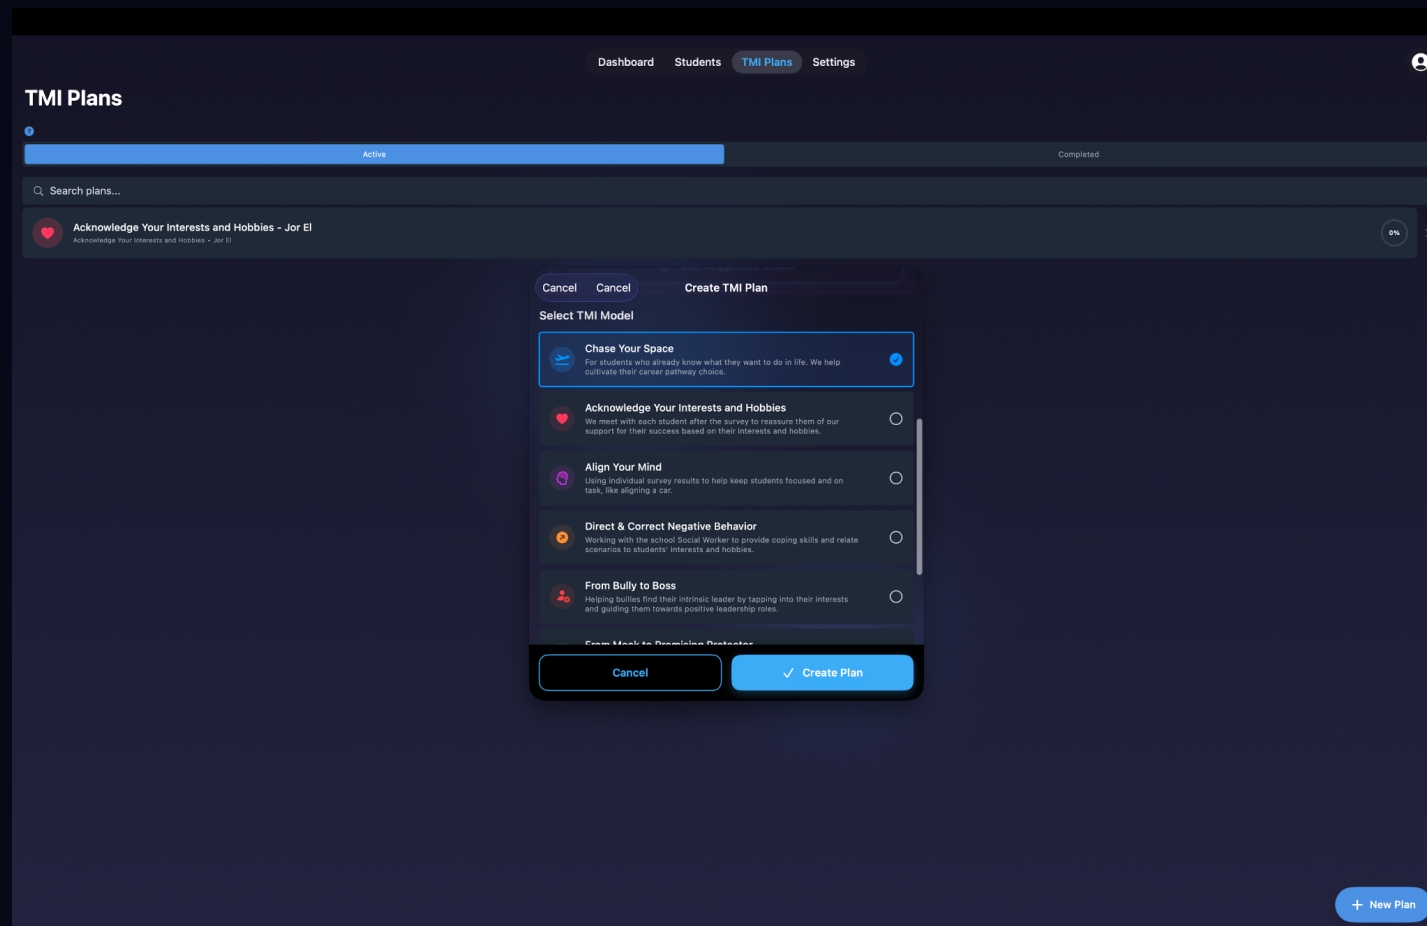

In Settings, educators can view and edit their profile, access the Help Center, contact support, and review Privacy Policy and Terms of Service. Account actions such as Log Out and Delete Account are clearly separated at the bottom of the page along with the current app version.

Create TMI Plan – Model Selection

Choosing the Right Intervention Model

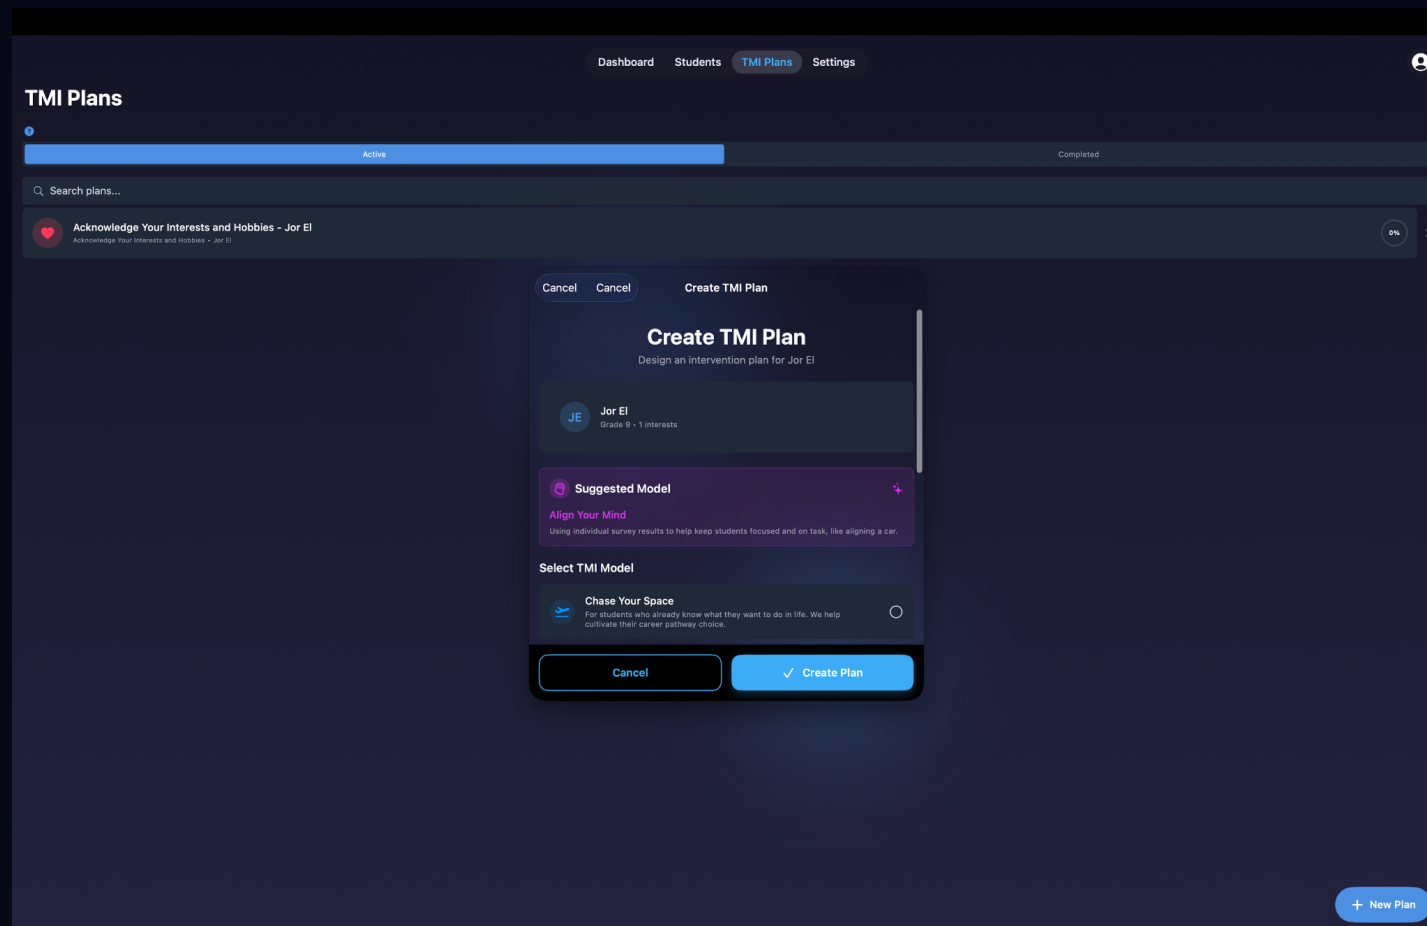

When creating a new plan, educators select from a library of TMI models such as Chase Your Space, Acknowledge Your Interests and Hobbies, Align Your Mind, Direct & Correct Negative Behavior, and From Bully to Boss. Each model includes a brief description and icon so staff can quickly find the best fit.

Create TMI Plan – Suggested Model

AI-Supported Recommendations

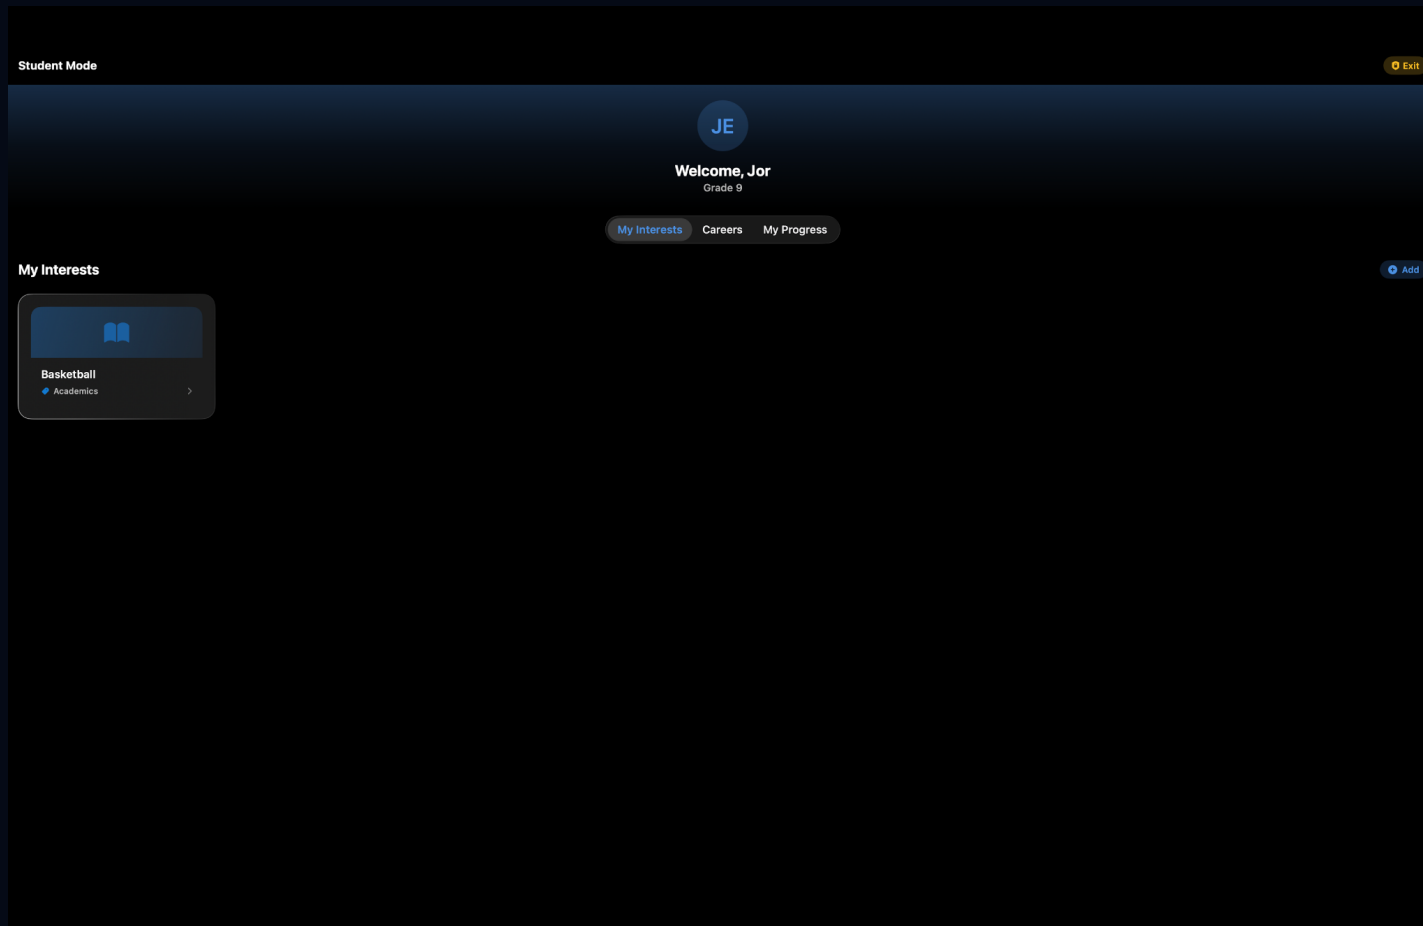

As part of the plan creation flow, TMI can surface a Suggested Model based on survey data and existing student information. The educator sees the student's context at the top, the suggested model in a highlighted card, and the list of all models below before finalizing the plan.

Student Mode Home

Welcome, Jor

Student Mode presents a clean, focused view for learners. They see a welcome banner with their name and grade plus three tabs: My Interests, Careers, and My Progress. On the left, existing interests such as Basketball are shown in card form, and an Add button allows new interests to be captured during the session.

Survey – What Excites You?

Capturing High-Level Interest Areas

Early in the survey, students answer “What excites you?” by choosing from tiles like Audio & Media, Health & Wellness, Technology & Gaming, Creative Arts, Sports & Athletics, and Business & Entrepreneurship. Students can select multiple tiles, building a broad picture of where their curiosity naturally goes.

The screenshot displays a digital survey interface for a student named Jor, a Grade 9 student. The interface is titled "Student Mode" in the top left corner, with an "Exit" button in the top right. A central header area shows the student's initials "JE" and a welcome message: "Welcome, Jor Grade 9". Below this, there are three tabs: "My Interests" (selected), "Careers", and "My Progress".

On the left side, under the "My Interests" tab, there is a section titled "My Interests" showing a list of selected interests. The first item is "Basketball" with a blue icon, and below it, "Academics" is listed with a blue checkmark and a right-pointing arrow.

The main content area is titled "What excites you?" and includes the instruction "Select all that interest you". It features a grid of six interest tiles, each with an icon and a label: "Audio & Media" (microphone icon), "Health & Wellness" (heart icon), "Technology & Gaming" (laptop icon), "Creative Arts" (skull and crossbones icon), "Sports & Athletics" (runner icon), and "Business & Entrepreneurship" (briefcase icon). The "Sports & Athletics" tile is currently selected, indicated by a blue border. At the bottom of the grid are two buttons: "< Back" and "Next >".

At the top of the main content area, there is a progress indicator showing "Question 2 of 6" and "16%". An "Add" button is located in the top right corner of the main content area.

Survey – What Do You Do for Fun?

Hearing Student Voice in Their Own Words

Next, students respond to an open-ended prompt: “What do you do for fun?” They type their own description of favorite activities (for example, “I love to play basketball for fun”). This free-text answer gives educators authentic language and nuance that multiple-choice questions can miss.

The screenshot shows a student survey interface. At the top left, it says "Student Mode" and at the top right, there is an "Exit" button. The main header area features a circular profile icon with the initials "JE", followed by the text "Welcome, Jor" and "Grade 9". Below this are three tabs: "My Interests" (which is active), "Careers", and "My Progress". On the left side, under the "My Interests" tab, there is a section titled "My Interests" with a book icon. Below the icon, it says "Basketball" and "Academics" with a right-pointing arrow. The main content area shows "Question 3 of 6" and a progress bar at 33%. The question title is "What do you do for fun?" with a subtitle "Tell us about your favorite activities and hobbies". Below this is a large text input field containing the text "I love to play basketball for fun". At the bottom right of the input field, it says "33 characters". At the bottom of the screen, there are two buttons: "< Back" and "Next >".

Survey – How Do You Like to Learn?

Preferred Learning Styles

Students choose their preferred way of learning: watching videos, reading articles & books, hands-on practice, or working with others. This information informs which types of resources are most likely to engage them within TMI plans and classroom activities.

Survey – Importance of Passion in a Career

Career Mindset and Motivation

On a 1–5 scale, students indicate how important it is for them to follow their passion in a career. This gauge helps counselors understand whether a student prioritizes interest alignment, stability, or other factors when thinking about the future.

The screenshot shows a digital survey interface for a student named Jor. At the top left, it says 'Student Mode' with an 'Exit' button. The student's profile 'JE' is shown with a welcome message 'Welcome, Jor' and 'Grade 9'. Navigation tabs for 'My Interests', 'Careers', and 'My Progress' are present. A progress bar indicates 'Question 5 of 6' with a 66% completion rate. The current question is 'How important is following your passion in a career?' with a scale from 1 (Not important) to 5 (Very important). The number 4 is selected. A 'My Interests' sidebar on the left lists 'Basketball' and 'Academics'. Navigation buttons for '< Back' and 'Next >' are at the bottom.

Survey – Dream Job

If You Could Be Anything...

The final survey question invites students to dream: “If you could be anything, what would your dream job be?” They can type an answer or select from suggested options like Athlete, Entrepreneur, Teacher, Doctor, or Engineer. This step connects immediate interests to long-term aspirations.

Interest Profile Results

You Did It!

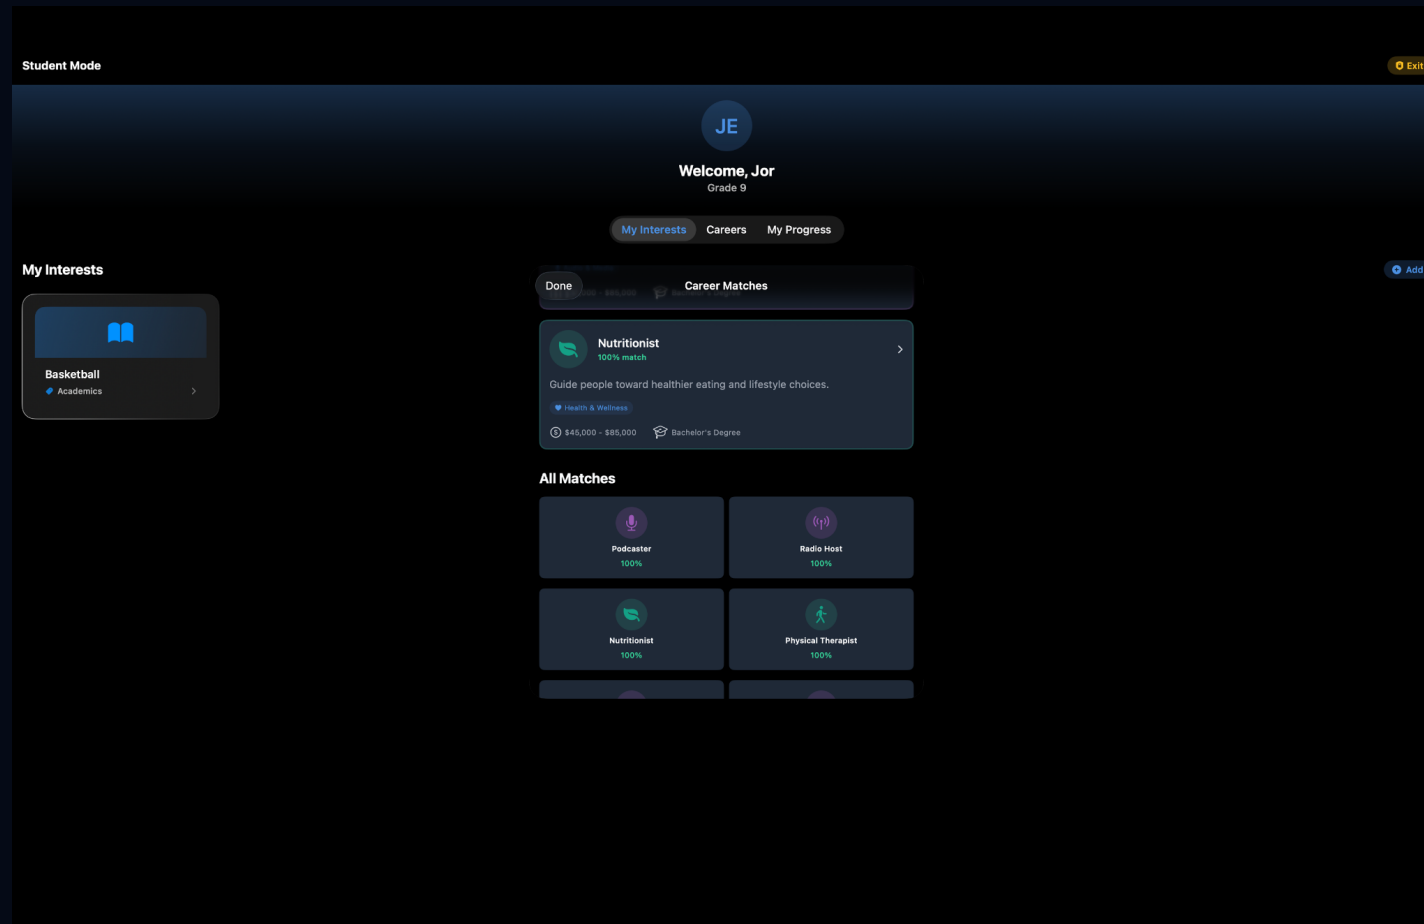

Once the survey is complete, students see a confirmation screen summarizing their Interest Profile. Top categories such as Health & Wellness and Audio & Media appear with visual match bars, while a row of interest chips (for example, Health & Wellness, Audio & Media, Athlete) highlights key themes. This becomes the foundation for career and plan recommendations.

Career Matches

From Interests to Pathways

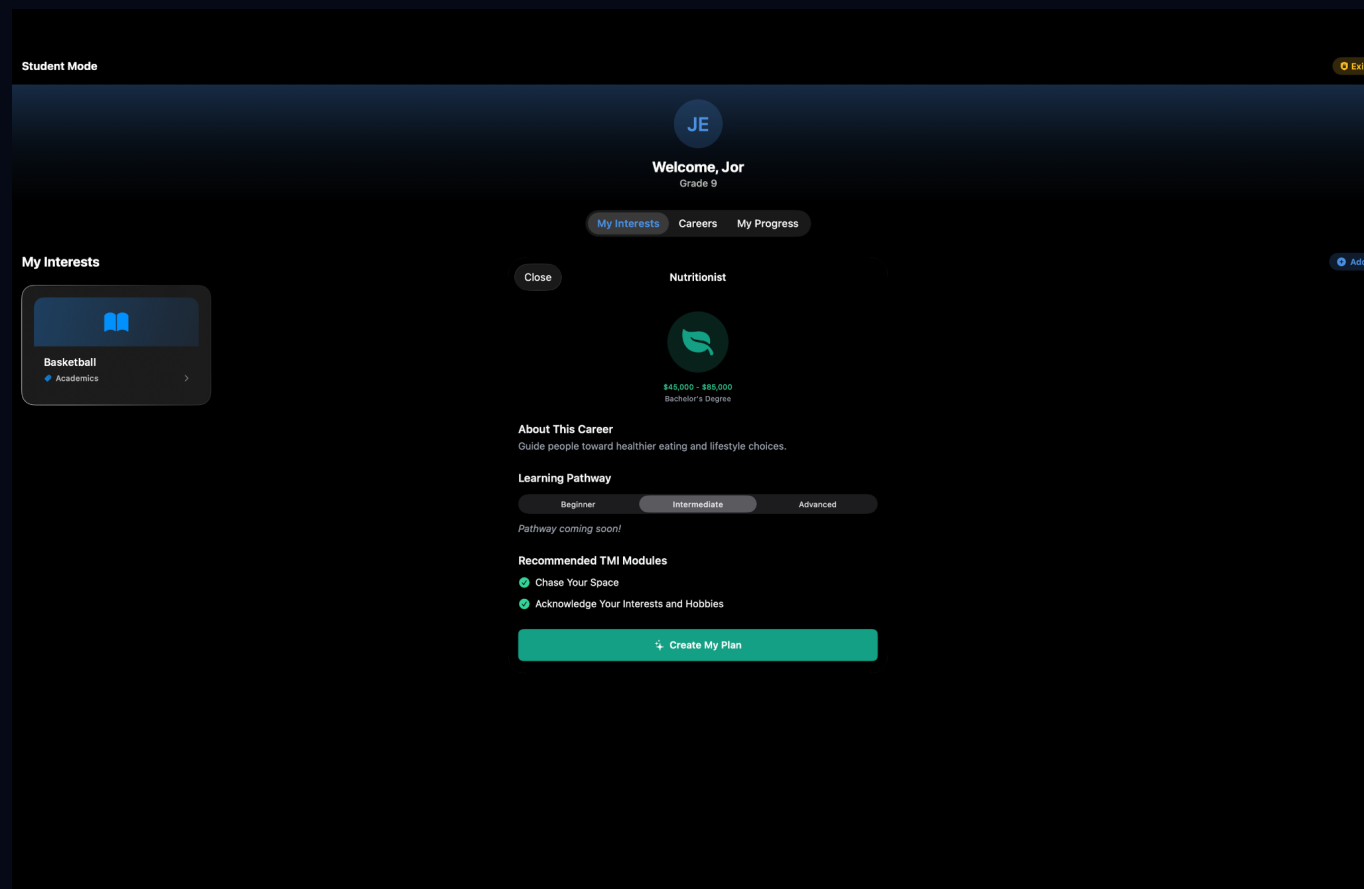

In the Careers tab, TMI converts the interest profile into concrete career ideas. A featured card displays the top match—such as Nutritionist—with a 100% match rating, salary range, education level, and career cluster. Additional matches like Podcaster, Radio Host, and Physical Therapist are shown in a grid below.

Career Detail & Plan Creation

Recommended TMI Modules

Selecting a career opens a detailed view describing the role, expected salary range, and education requirements. A Learning Pathway component (Beginner, Intermediate, Advanced) will guide future exploration. Below, Recommended TMI Modules such as Chase Your Space and Acknowledge Your Interests and Hobbies connect this career to specific intervention frameworks. A “Create My Plan” button provides a direct bridge back to the educator-facing TMI plan workflow.
